PROFESSIONAL SUMMARY

Results-driven Data Analyst and Business Intelligence Developer with hands-on expertise in Power BI, MS SQL Server, and ETL pipeline design. Certified Microsoft Fabric Analytics Engineer (DP-600) with a proven track record of transforming complex, multi-source datasets into interactive dashboards and actionable insights that drive strategic decision-making. Experienced in engineering Star Schema data models, advanced DAX measures, and automated SSIS workflows across diverse business domains. Adept at communicating analytical findings to both technical teams and C-level stakeholders, bridging the gap between raw data and measurable business outcomes.

PROJECTS

Flight Performance & Delay Analysis | *Power BI, Power Query, DAX*

- Engineered a Star Schema data model by performing advanced data cleaning and ETL transformations in Power Query to process large-scale aviation datasets and standardize time-series logs.
- Developed a comprehensive multi-page dashboard with complex DAX measures for Average Delay Duration and On-Time Arrival Percentage, successfully pinpointing key operational bottlenecks.

Sales & Customer Data Warehouse | *MS SQL Server, SSIS, T-SQL*

- Architected a centralized enterprise data warehouse by integrating disparate ERP and CRM source systems, engineering automated SSIS ETL pipelines to consolidate multi-source datasets into a unified dimensional model.
- Implemented advanced data cleansing and validation protocols to enforce data integrity, delivering SQL-based BI reports on customer behavior patterns that facilitated strategic decision-making.

AdventureWorks Sales Dashboard | *Power BI, SQL, DirectQuery, DAX*

- Developed a multi-page executive dashboard analyzing \$109.85M in revenue across 121K orders, leveraging DirectQuery for real-time SQL connectivity and time-intelligence DAX to track Sales Growth %.
- Implemented data validation and cleansing logic within SQL views to ensure cross-report accuracy, identifying the Southwest region as the top revenue driver contributing to strategic territory planning.

Library Analytics Dashboard | *Power BI, DAX, Data Modeling*

- Delivered end-to-end data cleaning, modeling, and reporting on 232K+ library borrow records and \$5M in tracked revenue, with automated data profiling for inventory lifecycle management.
- Identified Philosophy as the top revenue category (14.63%) using custom DAX and Top-N filters, directly informing procurement and collection distribution strategies.

EXPERIENCE

Power BI Developer Trainee

Jan. 2026 – May 2026

Information Technology Institute (ITI) — Cairo, Egypt

- Completed intensive, project-based training covering the full data lifecycle: MS SQL Server, advanced ETL processes with SSIS, and data warehouse architecture.
- Engineered robust data models using Star Schema design, optimizing relational databases to ensure high data accuracy, integrity, and query performance.
- Built interactive dashboards and automated reports in Power BI using Advanced DAX formulas and Power Query transformations to convert complex business requirements into actionable insights.

Digital Marketing Associate

Aug. 2023 – Oct. 2025

Retailo Business Solutions

Maadi, Cairo, Egypt

- Built a data-driven reporting workflow by transforming raw marketing KPIs into structured insights, enabling data-backed decisions that improved campaign targeting efficiency.
- Designed and presented performance dashboards to C-level and non-technical stakeholders, effectively bridging the gap between analytical findings and strategic business execution.

CERTIFICATIONS

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) — Microsoft, 2025

EDUCATION

Al-Azhar University

Cairo, Egypt

Bachelor of Science, Pharm-D Pharmacy — Grade: Very Good

Sept. 2019 – June 2025

TECHNICAL SKILLS

Business Intelligence & Visualization: Microsoft Power BI (DirectQuery, Star Schema, Power Query, Advanced DAX), Tableau
Database & ETL: MS SQL Server, SSMS, SSIS, SSAS, Data Warehouse Modeling, ETL Pipeline Design, T-SQL
Data Analysis & Programming: Advanced DAX, Python (Pandas, NumPy, Matplotlib, Scikit-learn), Excel (Advanced)
Developer Tools & Methodologies: Git, GitHub, VS Code, Streamlit, Agile

SOFT SKILLS

Analytical Thinking | **Communication** | **Attention to Detail** | **Problem Solving** | **Adaptability**
